Gameplay Rules Amendments

As we are doing our own campaign that this ruleset was not designed for, there will be numerous rules, traits and properties that will need to be either changed for balance reasons, changed to make sense with lots of units having only 1 wound instead of the 3 that this ruleset was designed for, or just clarified in cases where there is some ambiguity in the wording of the rulebook.

Wounding

Regular Wound Table (D10)

2- – **Nothing**
3-6 – **Shaken**
7+ – **Wounded**
Nat 10+ – **Wounded & Downed**
+1 to roll for each wound target has already sustained

Stun Wound Table (D10)

2- – **Nothing**
3-5 – **Shaken**
6-7 – **Shaken x 2**
8+ – **Wounded**
Nat 10+ – **Wounded, Downed & Shaken**
+1 to roll vs droids

+1 to above rolls if within 12" and line of sight of a unit with the Leader trait.

Armour

Taking hits damages the integrity of your armour. For each wound your unit has already sustained, their armour roll has a -1 modifier.

Recovery

Shock Recovery Table (D10)

1- – **Run Away** Immediately make 2 full moves directly away from whatever last inflicted shock on the unit, if this takes the unit off the battlefield, they are removed from play. Ends Turn.
2-5 – **Still Shaken** No shock tokens are removed, but you may choose to move up to 5" away from whatever last inflicted shock on the unit. 1 action remaining but cannot use it to try and recover
6+ – **Recovered** Remove all shock tokens. 1 action remaining
-1 to roll for each shock and wound token on the unit

Downed Recovery Table (D10)

1- – **Bleed Out** The unit succumbs to its wounds and is taken out of play.
2-5 – **Still Downed** The unit stays downed, but may crawl up to 2"
6+ – **Recovered** The unit stands up. 1 action remaining.
-1 to roll for each shock and wound token on the unit

Retreat

If the number of shock tokens on a unit exceeds its remaining number of wounds at the start of their activation, they must make a task roll, to check if they will retreat or not. If they pass the task roll, they continue their activation as normal, if they fail, they Run Away (as detailed above), and then their activation ends. The difficulty of the task roll depends on how much excess shock they have.

- Exceeds by 1 – Easy (3+)
- Exceeds by 2 – Medium (5+)
- Exceeds by 3 – Hard (8+)

Weapon Properties

(nerf) **Deadly** – Natural CC rolls of 10+ result in an automatic Wounded result, rather than out of action

Actions

Aiming - Now grants +2 instead of +1

Suit Order

Special Cards

Queen of Spades – Remove all Shock
Queen of Hearts – Remove 1 Wound, once per unit, gets more difficult each time D10 (2+,4+,6+,8+,10)
One Eyed Jacks – +1 Shoot rolls
Other Jacks – +1 to Close Combat rolls
7cards – Reroll one die result
6 cards – Reload Automatically
Deuce – Roll 2 dice, pick the best result
Aces – Wild

Movement

Walking – 5"/Creeping – 3"
-1" of movement per wound + shock, per action moving.
Difficult Terrain: Half rate.
Obstacles: -1" for low walls and fences, full action for high walls (up to 2x model height).
Up/Down a Floor: -3"

Recovery

Shock Recovery Table (D10)	Downed Recovery Table (D10)
1- – **Run Away**	1- – **Bleed Out**
2-5 – **Still Shaken**	2-5 – **Still Downed**
6+ – **Recovered**	6+ – **Recovered**
-1 to roll for each shock and wound token on the unit	*-1 to roll for each shock and wound token on the unit*

Shooting

Short Range 5+/Long Range 8+ to hit.
Shooting Modifiers to the Die Roll:
Cover: Light Cover -1/Heavy Cover -2
Size: Target is Small -1/Large +1/Huge +2
Wounds/Shock: -1 for each Wound and Shock marker.
Other: Target is Downed -1/Target is Creeping -1
Shooter used first action to Aim +2

Close Combat

Close Combat Modifiers to the Die Roll:
Wounds/Shock: -1 for each Wound and Shock marker.
Outnumbered: -1 per attacker after first (i.e. -1 for facing 2 attackers, -2 for 3 attackers etc).
Prone or no weapon: -1
Close Combat Weapon: +? according to weapon.
Defending a wall/defensive terrain: +1

If the roll is a tie after modifiers are applied, the units stay locked in combat.

Take the difference between the 2 dice rolls after modifiers and gain the following bonuses on your wound roll:
1-2: 0 3-4: +1 5-6: +2 7 or more: +3

Wounding

Regular Wound Table (D10)	Stun Wound Table (D10)
2- – **Nothing**	2- – **Nothing**
3-6 – **Shaken**	3-5 – **Shaken**
7+ – **Wounded**	6-7 – **Shaken x 2**
Nat 10+ – **Wounded & Downed**	8+ – **Wounded**
+1 to roll for each wound target has already sustained	Nat 10+ – **Wounded, Downed & Shaken**
	+1 to roll vs droids
